Our History

Teva Acquires Actavis Generics

Joining forces to build our new future

Share on Facebook Share on LinkedIn Share on Twitter

At Teva, we continually evaluate and pursue growth opportunities that advance our goal of being a stronger, more diversified organization with the scale and resources to drive value across our business today and in the future.

The acquisition delivers on these objectives, while enabling us to take a leading position in our transforming industry.

This strategic acquisition brings together two leading generics businesses with complementary strengths, brands and cultures, providing patients with more affordable access to quality medicines, and creating significant financial benefits for Teva stockholders.

Our newly combined company offers the richest product pipeline in the generic industry and will continue to lead the way with complementary technologies and product portfolios, offering more differentiated and durable products than any other generic company of this scale.
